Kate,

There were two studies submitted; here they are.

Eugene,

I got your letter describing the revisions to the Consistency Determination and permit. Thank you. I am in the process of writing up our findings with the intention of scheduling a hearing on this matter during the June Commission meeting.

I would like to follow up on the discharge alternative study (see below). You sent me the 2009 letter from the EPA to CCC staff, which I now have in the file. However, the letter does not discuss the details of the conclusions of the OCS discharge alternatives study (i.e., why the platforms found that barging and re-injection were infeasible), which I will need to include in our findings. Would you mind sending me a copy of the OCS discharge alternatives study? If there is an Executive Summary that briefly states the conclusions of the study, that should be more than sufficient.

Thank you!

Kate
